Salmonella Vaccines 100 ml / 250ml

### Dry Cow Therapies

At Warrnambool Veterinary we are committed to providing tailored animal health solutions for your dairy herd. To identify the most appropriate strategy, we are introducing the "Annual Herd Health Check-up". This will be a 15 minute consultation (at NO CHARGE) to determine which preventative vaccines and treatments are most suitable for your herd.

In conjunction with Zoetis, Warrnambool Veterinary is also able to undertake testing of your herd for important mastitis pathogens and screen the herd for pestivirus at NO CHARGE until June 30th 2016. These tests will be discussed at your Herd Health Check-up.
