- Housing
- Weight monitoring and management
- Coccidiosis, diarrhea, Johne's Disease
- Heifer rearing

The Total Calf Rearing School is essential if you are committed to rearing high quality replacement heifers.

For further information or to enrol in the Total Calf Rearing Course or the Herd Health Management Course call The Farm Desk on 5561 7666.

HERD HEALTH MANAGEMENT COURSE

\$385 per person

The course is designed to give an overview of dairy farm management from nutrition to reproduction and mastitis control. It addresses issues we commonly see as a problem on the dairy farms our vets visit.

Topics covered include:

- Reproductive management
- Milking
- Mastitis Control
- Problems Associated with Calving
- Metabolic Diseases
- Calf Rearing – Management and Diseases
- Growing Replacements – from Calving to Mating
- Basics of Nutrition – Use of Grain, Supplements, Pastures, Fodder crops & Problems
- Lameness
- Salmonella, Worms
- Mineral Deficiencies
- And other diseases
- The Use of Computers in Farm Management – including Dairy Data and FarmCash
